

CanAlaska Uranium Ltd.

CVV - TSX.V CVVUF - OTCBB DH7 - Frankfurt

FOR IMMEDIATE RELEASE

NEWS RELEASE

NON-BROKERED PRIVATE PLACEMENT

Vancouver, Canada, January 25, 2007 – CanAlaska Uranium Ltd. (CVV – TSX.V) (the “Company”) announces a non-brokered private placement of non-flow-through units (the “NFT Units”) at a purchase price of \$0.72 per NFT Unit and flow-through units (the “FT Units”) at a purchase price of \$0.85 per FT Unit for gross proceeds of up to \$5,000,000.

Each NFT Unit will consist of one common share and one-half of one non-transferable share purchase warrant. Each whole warrant entitles the holder to purchase one additional common share at a price of \$0.93 for a period of 12 months from closing.

Each FT Unit will consist of one flow-through common share and one-half of one non-flow-through common share purchase warrant. Each whole warrant entitles the holder to purchase an additional common share at a price of \$1.10 for a period of 12 months from closing.

The proceeds from the private placement will be used for working capital as well as for the exploration of the Company’s uranium properties.

A finder’s fee may be paid. The foregoing is subject to regulatory approval.

About CanAlaska Uranium Ltd. -- www.canalaska.com

CanAlaska Uranium (CVV -- TSX.V, CVVUF -- OTCBB, DH7 -- Frankfurt) is undertaking uranium exploration in seventeen 100%-owned and two optioned uranium projects in Canada's Athabasca Basin. Since September, 2004, the Company has aggressively acquired one of the largest land positions in the region, comprising over 2,500,000 acres (10,117 sq. km or 3,906 sq. miles). In 2005/2006, CanAlaska expended over Cdn\$15 million exploring its properties in the Athabasca Basin and has delineated multiple uranium targets. Initial drilling from the West McArthur Project (now under an earn-in option to be formalized with Mitsubishi Development Pty. Ltd.) revealed uranium mineralization and significant zones of hydrothermal alteration, indicative of a favorable environment for uranium deposition. Active drilling and exploration will continue in Winter, 2007 at West McArthur and at 4 other significant projects.
